Profile

Computer Science undergraduate specializing in Artificial Intelligence and Data Science with hands-on experience in machine learning model development, data analysis, and generative AI integration. Adept at designing end-to-end ML pipelines, deploying interactive applications, and solving real-world problems through scalable software solutions.

Education

Meerut Institute of Engineering and Technology, Bachelor of Technology in Computer Science and Engineering (Data Science) Aug '23 – Aug '27

- **CGPA:** 8.22
- **Key Courses:** Data Structures and Algorithms, Operating Systems, Database Management Systems, Software Engineering

Projects

AI-Based Credit Card Fraud Detection System – Python, Streamlit, Scikit-learn Oct '25 – Nov '25

- Architected a supervised machine learning pipeline for real-time credit card fraud detection using synthetic transaction datasets.
- Applied data preprocessing, feature scaling, and multi-model evaluation to enhance classification reliability.
- Deployed an interactive Streamlit dashboard enabling live transaction prediction with confidence scoring.

AI-Powered MCQ Generator – Python, Streamlit, Google Gemini API Feb '25 – Apr '25

- Developed an automated MCQ generation system leveraging generative AI for contextual question creation.
- Integrated Gemini API to extract structured content and dynamically generate domain-specific questions.
- Streamlined bulk export functionality, reducing manual question preparation effort by approximately 40%.

Experience

Generative AI Virtual Intern – SmartInternz (Google Cloud) Sep'2024 – Oct'2024

- Executed guided projects focused on generative AI applications and cloud-based model workflows.
- Analyzed prompt engineering techniques to improve output precision and contextual alignment.
- Explored inference pipelines to understand model behavior across varied real-world scenarios.

Certifications

Oracle Cloud Infrastructure Data Science Professional – Oracle University Sep '25

Oracle Generative Artificial Intelligence Professional – Oracle University Sep '25

Generative AI with Gemini & Streamlit – Google Cloud Nov '24

Generative AI for Data Scientists – Google Cloud Nov '24

AI Fundamentals – IBM May '24

Technical Skills

Programming Languages: Python, SQL, Java

Machine Learning & Data Science: Model Training, Predictive Modeling, Feature Engineering, Model Evaluation, Data Preprocessing

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn

Tools & Platforms: Google Cloud Platform, Gemini API, Streamlit, Power BI, Excel, Git, Jupyter Notebook

Data Techniques: Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development.

Soft Skills : Problem-Solving, Time Management, Analytical Thinking

Achievements

- Secured successful completion of a **Generative AI Virtual Internship** powered by Google Cloud through SmartInternz.
- Participated in **Codequest #20 Coding Challenge** by Naukri Campus, demonstrating analytical problem-solving capability.
- Earned multiple industry-recognized certifications in **Artificial Intelligence, Data Science, and Python.**
